CONTENTS OF VOLUME 31

Number 1

A. M. Hasson	1	A study of solar energy and its components under a plastic greenhouse
Y. P. Yadav and Y. N. Prasad	7	Parametric investigations on a basin type solar still
A. Nilufer Egrican	17	Performance of a solar assisted heat pump system
Y. P. Yadav and Ashok Kumar	27	Transient analytical investigations on a single basin solar still with water flow in the basin
M. Altamush Siddiqui	39	Optimal cooling and heating performance coefficients of four biogas powered absorption systems
M. Al-Riahi, N. Al-Hamdani and H. Al-Safar	51	Monthly frequency distribution of daily clearness index values in Iraq
G. K. Muralidhar, J. Naga Raju and S. Mohan	61	Differential temperature controller: an energy conservative device for solar water heating systems
V. K. Sharma, Sanjay Sharma and H. P. Garg	65	Mathematical modelling and experimental evaluation of a natural convection type solar cabinet dryer
G. De Giorgi, S. Fumagalli, G. Rizzi and V. K. Sharma	75	Design, development and experimental performance of solar collector–storage system for space heating applications
M. S. Sodha, D. Buddhi and R. L. Sawhney	95	Thermal performance of underground air pipe: different earth surface treatments
Software Survey Section	I	

Number 2

M. F. M. Fahmy and M. Abdel-Sadek	105	Transient analysis of hot water systems with tanks in series
D. A. Kouremenos, E. Rogdakis and K. A. Antonopoulos	111	Anticipated thermal efficiency of solar driven NH_3/H_2O absorption work producing units
M. F. M. Fahmy and A. M. Labib	121	Modeling and analysis of a matrix solar air heater
Ashok Kumar, J. D. Anand and G. N. Tiwari	129	Transient analysis of a double slope–double basin solar distiller
K. A. Joudi, T. A. Abd-Al Hussain and P. M. Abdul Majeed	141	Improved heat transport of heat pipes with an internal wall separating liquid and vapour streams

HASSAN E. S. FATH	149	Heat exchanger performance for latent heat thermal energy storage system
DAN SOLOMON	157	Design of a thermomagnetic generator
S. CHATTERJEE, H. N. ACHARYA and V. V. RATNAM	175	Grain size effect on the polarity of Seebeck coefficient of natural galena
J. C. HO and T. T. CHANDRATILLEKE	179	Thermodynamic analysis of an electric arc furnace
R. K. MAZUMDER and M. HUSSAIN	187	Optical and thermal performance testing of a discrete mirror, seasonally adjusted, linear solar concentrator with tubular absorber
M. M. PANDEY and PITAM CHANDRA	193	Uniformly illuminated absorber surface for parabolic reflectors
Technical Note		
G. N. TIWARI and S. A. LAWRENCE	201	New heat and mass transfer relations for a solar still
Software Survey Section	I	

Number 3

S. S. MATHUR, T. C. KANDPAL and B. S. NEGI	205	Optical design and concentration characteristics of linear Fresnel reflector solar concentrators—I. Mirror elements of varying width
S. S. MATHUR, T. C. KANDPAL and B. S. NEGI	221	Optical design and concentration characteristics of linear Fresnel reflector solar concentrators—II. Mirror elements of equal width
S. K. DAS and A. CHAKRAVERTY	233	Performance of a solar collector with different glazing materials and their degradation under the condition prevailing in a solar collector
J. L. HERCE-VIGIL and R. SUAREZ	243	Analysis of a plastic solar collector
Y. P. YADAV	255	Analytical performance of a solar still integrated with a flat plate solar collector: thermosiphon mode
S. TIA, S. C. BHATTACHARYA and P. WIBULSWAS	265	Thermogravimetric analysis of Thai lignite—I. Pyrolysis kinetics
S. TIA, S. C. BHATTACHARYA and P. WIBULSWAS	277	Thermogravimetric analysis of Thai lignite—II. Char combustion kinetics
W. WOLDE-GHIORGIS	285	Industrial energy utilization patterns in a developing country: a case study of selected industries in Ethiopia
KHYRUDDIN A. ANSARI	295	On the design of multi-component cable systems for moored offshore vessels
Software Survey Section	I	

Number 4

R. C. Tiwari, Ashvini Kumar, S. K. Gupta and G. D. Sootha — 309 — Thermal performance of flat-plate solar collectors manufactured in India

Tariq Muneer and Simon Michael Scott — 315 — Density and temperature explicit equations of state for steam

R. K. Mazumder, M. Hussain and T. C. Kandpal — 327 — Economics of the use of seasonally adjusted linear solar concentrators in Bangladesh

Y. P. Yadav and G. N. Tiwari — 337 — Large scale solar water heater: experimental and theoretical studies

Punita Taneja, S. S. Mathur and T. C. Kandpal — 353 — Optical performance analysis of a seasonally adjusted circular cylindrical solar concentrator

V. K. Sharma, G. Rizzi and H. P. Garg — 369 — Design and development of an augmented integrated solar collector with rock storage system for heating applications

V. K. Sharma, G. Rizzi and H. P. Garg — 379 — Design and development of a matrix type solar air heater

Constantinos A. Balaras and Sheldon M. Jeter — 389 — A methodology for selecting and screening novel refrigerants for use as alternative working fluids

Azmi Kaya and Marion A. Keyes — 399 — A novel method and procedure for on-line measurement of fluid properties

Software Survey Section — I

Number 5

Lin Wenxian, Lu Enrong and Wang Dongcheng — 409 — The solar water heating system with natural circulation assisted by an auxiliary electric heater—performance modeling

P. C. Pande and K. P. Thanvi — 419 — Design and development of a solar dryer cum water heater

Radhey Shyam Mishra — 425 — Thermal stratification in thermosyphonic solar water heating systems

Radhey Shyam Mishra — 431 — Techno-economic evaluation of hybrid thermosyphonic solar water heating systems

C. D. Rakopoulos — 447 — Influence of ambient temperature and humidity on the performance and emissions of nitric oxide and smoke of high speed diesel engines in the Athens/Greece region

S. C. KAUSHIK, S. M. B. GADHI, R. S. AGARWAL and Y. KUMAR — 459 — Feasibility studies on an alcohol–salt mixture for absorption refrigeration systems

ASHOK KUMAR BHARGAVA, H. P. GARG and RAM KUMAR AGARWAL — 471 — Study of a hybrid solar system—solar air heater combined with solar cells

M. ZAHEER-UDDIN and P. FAZIO — 481 — Zone-adjustable, direct vent gas-fired heating systems

S. SCESA — 489 — Analysis of a cogeneration system

DONATIEN NJOMO — 495 — Modelling the heat exchanges in a solar air heater with a cover partially transparent to infrared radiation

Technical Note
G. N. TIWARI and S. A. LAWRENCE — 505 — A transient analysis of a closed loop solar thermosyphon water heater with heat exchangers

Software Survey Section — I

Number 6

M. S. SODHA, RAM CHANDRA, KAMNA PATHAK, N. P. SINGH and N. K. BANSAL — 509 — Techno-economic analysis of typical dryers

ASIM K. SEN — 515 — A scheme for generating electricity using gravitational energy

MEIRIOS MOECHTAR, MELANIE JUWONO and EDDY KANTOSA — 521 — Performance evaluation of a.c. and d.c. direct coupled photovoltaic water pumping systems

K. FATHALAH and S. E. ALY — 529 — Theoretical study of a solar powered absorption/MED combined system

ERSOY TAŞDEMIROĞLU and RAMAZAN SEVER — 545 — Maps for average bright sunshine hours in Turkey

K. S. CHEN, Y. Y. CHEN, S. W. SHIAO and P. C. WANG — 553 — An experimental study of steady-state behavior of a two-phase natural circulation loop

CHIH WU — 561 — Power optimization of an endoreversible Brayton gas heat engine

J. SOMA — 567 — The energy ecology derived from thermodynamic mass equivalence reveals critical energy reliability faults

PETER W. BRENNECKE and HENNING H. EWE — 585 — Hydrogen evolution on highly porous Raney nickel cathodes in alkaline electrolyte

KAMEL G. MAHMOUD and HERBERT D. BALL — 595 — Solar desiccant systems for grain drying

Technical Note

ERSOY TAŞDEMIROĞLU and RAMAZAN SEVER — 599 — An improved correlation for estimating solar radiation from bright sunshine data for Turkey

Software Survey Section — I
